

**Swan Creek Pilot Watershed Project
Toledo Express Airport, Banquet Room
June 14 at 9:00 AM
Agenda**

Introductions

Preliminary Priority Maps

Marcus Ricci and Kurt Erichsen

Action requested: approve maps for June 20th meeting

Agenda for 6/20 Public Meeting

Kurt Erichsen

Powerpoint presentation for 6/20, for discussion and any final revisions

Marcus Ricci

Public input on Priority Area maps at 6/20 meeting

Discussion of map review with communities at the public meeting.

Logistics of comparing PCA-PDA-PAA maps with comprehensive plan/zoning maps. Who will staff tables, what notes to take, reporting results

Public Comments

Next Steps

Next Meeting: time, date, place, agenda

=====

Downloading the Priority Area maps:

- 1) Open Windows Explorer by right clicking on "Start", then "Explore".
- 2) In the address window, **type ftp://ftp.tmacog.org**. A box will appear indicating there is an "FTP Folder Error" but click "OK" to ignore it. You will now have an entry in Windows Explorer that reads ftp.tmacog.org. To get access to the folder, you still need to log in.
- 3) Click on ftp.tmacog.org to highlight it if it isn't already. In the Menu Bar, click on "File", then "Login As...". A window will appear for you to enter the User Name and Password. The **User Name is tmacogftp** and the **Password is**

tmacogftp1234. When you are finished, click “Log On” and you will be on the site.

4) The files are in the **Swan_Creek folder**. To download files, simply drag the files you want from the right side window to the directory of your choice to save it or you can double click to open it. Files can be added to the FTP Site by dragging them into the right side window.

5) If necessary, we will email you the files — they total about 3 mb.
