

Background: On the Move is a process for setting regional priorities for transportation projects, initiatives and policies for the Toledo metropolitan area (Lucas, Wood and southern Monroe counties). The plan will address **all modes of transportation** (walking, cycling, cars/trucks/highways, public transit, rail, water and air) as well as impacts on quality of life, safety, environment, and economic health of the region. It must be completed by spring 2007 to maintain the region’s eligibility for federal highway dollars. More information is available at www.tmacog.org/onthemove.htm.

Question: In the attached draft project list, do you see individual items or groups/patterns of projects that raise concerns about potential impacts on the natural or manmade environment?

ف I/We have reviewed the draft On the Move project list dated _____, and at present do not have comments about the potential natural or community environmental impacts at the general conceptual level of these projects.

ف I/We have reviewed the draft On the Move project list dated _____, and we have the following comments:

Project number(s) and short name	What is your comment or concern? <i>(Examples: impact on wetlands, streams, air quality, or historic sites; loss of farmland or endangered species habitat; proximity of hazardous waste sites or sinkholes; etc.)</i>

Project number(s) and short name	What is your comment or concern?
Comments on the list of environmental data	
General comments
