

1-2 C Auto / environment: Reduce negative environmental impacts caused by autos

1. Shift modes
2. More Efficient autos
3. Alternate fuels
4. Increase/improve public transportation
5. Telecommuting, home deliveries, car pooling
6. Better maintenance
7. Contest sensitive design (incorporate env friendly components in design)
8. Education on auto maintenance
9. E-check
10. Make self propelled vehicle more for trans use than recreation
11. Stronger land use and zoning controls
12. Reduce parking spaces (diff., surfaces)
13. Raise gas tax [use funds for other modes]
14. Park 'N rides
15. Raise license fees fon non-municipal residents
16. ITS solutions for free-flowing traffic

1-1D Air / Toledo Express: Clarify Toledo Express's role in air passenger transportation –finding a way for Express and Detroit Metro to complement each other–and improve service and terminal.

1. Price and choice of destination
2. Expand passenger use
3. Use Toledo express as first stop (check-in) take bus or rail to Detroit)
4. Have we looked at connectivity between airports?
5. How is Airport funded?
6. Need to research future of airport (freight? passenger? Expansion)
