Passenger Goal Group Assignments

Here are the three items requiring further investigation from today's meeting.

- 1.) Make sure that we gather or confirm information surrounding the transportation needs and issues of the poor for the purposes of the report. Ensure that the needs of the poor are represented in the overall study.
- 2.) Define or see if methods exist that define the economic impact of improvements to the passenger transportation infrastructure.
- 3.) Can we (passenger group) have Paul Toth in a joint meeting between passenger and freight or have him attend a passenger meeting to define the role of Toledo Express in relation to Detroit Metro. Also establish the future capacity of Detroit metro with regard to the projected need of passenger service.
