**Subject:** Follow up Tasks - 2035 Passenger Group

Here are the meeting items that require further follow up prior to our next meeting.

- 1.) Investigate the impact and gather further clarity on the upcoming "SAFETEA-LU" changes and their impact on the development and implementation of the 2035 Transportation plan.—Diane R-E
- 2.) Determine whether there is a forward looking/long term plan for the operation and development of all of Ohio's airports (or just NW Ohio). Examples of items to be addressed include: land use policy, expansion plans, etc....—Dave G
- 3.) Is there a benchmark or innovative city with regard to bike path development, specifically cities that have integrated their bike paths into existing or abandon transportation systems. Is there a model plan created/implemented by another city that TMACOG could review, modify, and adopt to become their policy.—Ron M. & Dave G
- 4.) What cities have integrated all modes of passenger transportation into a common and highly functional system. Preferably cities of comparable size and character to Toledo.—Jim G & Diane R-E

If there are any questions, please let me know!

Thanks,

Brian
