

January 24, 2006

Notes from the Goal Group 6 meeting (Safety / Efficiency Group)

Gary Siegel accepted position of note taker.

Brian Babcock accepted position of time Keeper

The meeting schedule for the coming months would be the third Tuesday of each month from 8:30-10:30. It was decided the preferred date for the June 2006 meeting of all the goal groups was June 20, 2006.

David Gedeon explained the goal group process and explained the intended outcome of the goal groups. He also went through with the group the time line for the goal group to come up with solutions to the various needs.

It was decided that a process needs to be in place to handle a situation where a medium or low priority solution that addresses many issues across several goal groups might in the end be allowed to stand as a priority in the 2035 plan in place or along side a high priority solution with a narrow focus.

It was decided to change the name of the goal group to "Safety and Efficiency".

It was decided to change to goal statement to "designed and operated to promote safe and efficient travel across all modes". The objectives of the group were not modified.

Rick Thielen of Perrysburg requested that the geography of survey respondents be looked at and be brought to the groups attention. Patrick was asked to prepare something that would clarify the distribution of survey respondents.

Looking through the problem statements, the members proposed to have a separate subgroup under Congestion as "Reduce Congestion around schools". Under Safety the committee decided to eliminate the "Improve Safety during Inclimate Weather"
