#### National Highway System Intermodal Connectors:

- NHS connectors to major intermodal facilities are considered vital links in the nation's transportation system.
- They are the "last mile" connection between the National Highway System and the nation's most important seaports, airports, rail yards, pipelines, rail stations, and ferry terminals.

#### National Highway System:

- The National Highway System (NHS) is a network of roads important to the nation's economy, defense, and mobility. The NHS includes the interstate system, the strategic highway network (STRANET), principal arterials which provide access between arterials and important facilities, and intermodal and strategic highway network connectors.

### Map Inset

- Includes the Strategic Highway Network (STRANET) and other principal arterials.
- Source: FHWA; ODOT; MDOT; Lucas County; Monroe County

### Map Date

- 6/18/2018

### Lake Erie

- Nortwest Ohio (Ohio Willard/Inv) & other principal arterials.
