NOTES FROM THE TMACOG
SYSTEM PERFORMANCE & MONITORING COMMITTEE MEETING

The meeting was held on January 17, 2018 at 1:30 p.m. in the TMACOG Boardroom, 300 Martin Luther King, Jr. Drive, Suite 300, Toledo OH 43697-9508.

I. Call to Order – Vice Chair of the System Performance and Monitoring committee, Doug Parrish, called the meeting to order. Attendees included Stephanie Bartlett, Pete Bick, Brooke Biniker, Doug Parrish, Gary Stookey, Babar Stelzer, Mike Stormer, Lisa Householder, and Lance Dasher.

II. TMACOG Annual Work Program – The committee reviewed the contents within three sections of the Annual Work Program for the upcoming (2019) fiscal year. These sections included Safety Studies (60123), Continuing Planning – Data Collection and Management (60510), and Continuing Planning – Modeling and Forecasting (61520). The committee was asked to review the sections and provide any comments or new items by the end of February before the first draft is due to ODOT in early March. Suggestions brought up at this meeting include specifically reviewing crash data before and after safety-related construction projects (60123), prepare a presentation to this committee on the travel demand model (61520), and integrate Toledo’s PAVER data in with the ODOT PCR data (61520).

III. Congestion Locations in TMACOG Region – TMACOG staff is currently updating the Congestion Management Process report for the MPO region, last completed in 2013. The committee discussed how the data results of where congested locations are occurring are a product of the travel demand model, as well how staff has had to review and clean up the data before presenting it to this committee. An interactive map has been produced and will eventually be utilized by local jurisdictions to provide feedback about the network. This committee has requested that TMACOG staff do some further review of the model inputs and resulting data in an attempt to further justify the results are accurate. Lisa indicated the model is up to date with projects coded through the 2018 construction season, but will still perform additional network checks to make sure some of these resulting congested locations are coded properly. Also in the model, she will look at results during peak period times and will determine the precision of traffic count numbers. A table containing specific information at each location will also be provided to this committee to ease the burden of having to manually select each location in the interactive map. This topic will further be discussed at the next committee meeting.

IV. Other Business –

- Lisa mentioned that the Water Quality committee has requested use of the boardroom during the same meeting schedule as this committee. She will conduct a poll to determine when the best times work for all members. If we choose to keep this same meeting schedule, then our committee will have to start meeting in the library instead of the boardroom.
- The TMACOG General Assembly will take place on Monday, January 29, 2018 at the Holiday Inn – French Quarter in Perrysburg. Registration is currently open.
- The TMACOG Transportation Summit will take place Friday, March 16, 2018 at the Premier Banquet Hall in Toledo. Most of the program will be related to traffic safety planning. More details are forthcoming.

V. Next meeting date: March 5, 2018 at 1:30 p.m. in the TMACOG Boardroom.

VI. There was no further business, the meeting was adjourned.
